A HIGH-ORDER DISCONTINUOUS GALERKIN METHOD FOR THE BIDOMAIN PROBLEM OF CARDIAC ELECTROPHYSIOLOGY

Project N°2

Supervisors: Christian Vergara, Paola Antonietti

Federica Botta, Matteo Calafà

Course of Numerical Analysis for Partial Differential Equations

A.Y. 2020/2021

Table of Contents

Mechanical contraction of the human heart
↓
Electrical activation of the cardiac cells
↓
Continuos electrical diffusion over the entire cardiac surface.
